International School of Hydraulics

23 - 26 May 2023 • Kąty Rybackie • Poland

On behalf of the Organizing Committee of the 40th International School of Hydraulics 2023, we're honored to invite you to support our conference.

We hope that the participation of representatives of companies in our conference will not only raise its attractiveness, but also affect significantly the value of substantive and practical dimension of the presented content. We are confident that this cooperation will translate into real interaction between scientists and companies. We are particularly interested in bringing science and practice together on regular basis, thanks to participation of business representatives and researchers.

Our conference is held every 2 years, and it involves the most prominent experts from around the world. The participants are academics from leading Polish and foreign research centers and universities, as well as companies' representatives. Details on the conference topics, invited speakers and other information can be found on our dedicated website: ish2023.igf.edu.pl

The 40th International School of Hydraulics will take place at the Tristan Hotel situated near Gdańsk, at the holiday village by the Baltic Sea - Kąty Rybackie. Tristan Hotel & SPA is located just at the opening of the Vistula Spit. It gives an access for both - sandy beaches of Gdańsk Bay as well a natural coast of the Vistula Lagoon. Its location just few kilometers away from the currently being built ditch through the Vistula Split - one of the most important hydroengineering investments in Poland - makes this location very attractive from the scientific point of view.

Partners supporting the ISH2023 Conference are offered several packages. Sponsorship opportunities are divided into the following sections:

- Main sponsor
- Regular sponsor
- Event sponsor
- Scholarship support
- Merchandising

We are also open to all other suggestions. All packages may be modified according to the Partner's suggestions, needs and possibilities. We may also prepare the dedicated package of your choice.

We encourage you to become a Partner of the 40th International School of Hydraulics!

Monika Kalinowska & Paweł Rowiński
Conference Chairs
